*Quality • Service • Versatility*

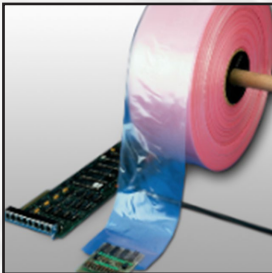

## **Gusset Bags**

Gusseted bags feature creased sides that expand to accommodate bulky items. Polyethylene bags are commonly used because they provide excellent protection and outstanding value. Elkay Plastics polyethylene bags are made from virgin materials and are FDA compliant for use in food applications.

## **Poly Tubing**

Poly tubing is excellent for creating protective packaging for items of varying length. The tubing can be cut to the desired length and sealed on one or both ends. These tubes are made from virgin materials so they are FDA compliant for use in food applications, and have been treated on one side to readily accept printing inks.

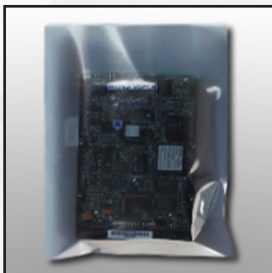

## **Pink Anti-Static Poly Tubing**

Pink Anti-Static material contains additives that effectively eliminate the hazard of static damage to sensitive electronic components during packaging, storing and shipping. It has a surface resistivity of  $10^{12}$  ohms/sq.in. and is amine-free, so it won't damage sensitive polycarbonate boards. PAS tubing is designed for applications in which Faraday Cage Protection is NOT required. The tubing can be cut to the desired length and sealed on one or both ends.

## **Pink Anti-Static Bag**

Pink Anti-Static material contains additives that effectively eliminate the hazard of static damage to sensitive electronic components during packaging, storing and shipping. It has a surface resistivity of  $10^{12}$  ohms/sq.in. and is amine-free, so it won't damage sensitive polycarbonate boards. PAS tubing is designed for applications in which Faraday Cage Protection is NOT required.

## **StratoGrey™ Static Shielding Bags**

Buried metal construction provides double protection against static discharge. Amine/amide-free interior will not corrode polycarbonate surfaces and produce no out-gassing. The semi-transparent material allows for easy identification of contents. Heat sealing effectively protects contents from moisture and foreign matter.

## **Reclosable Bags**

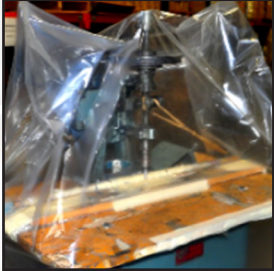

Reclosable bags provide outstanding protection, convenience and economy. The zipper seal closes securely and open easily time after time. Reclosable bags are excellent for storing, displaying, protecting and shipping all types of product. These bags are made with virgin resin and meet FDA requirements for contact with food products.

### **Pallet Top Sheet Covers**

Top Sheet Covers provide added protection for shrink wrapped pallets. They help protect contents from water and dust as well as helping ensure the integrity of the pallet contents.

### **Bags on Roll**

Bags on Rolls and equipment covers are packed on convenient size rolls and available no matter the size. Equipment covers protect equipment and help keep it clean and ready to use. Elkay's equipment covers are made from virgin resin and are FDA compliant for food contact.

### **Bin Liners**

Bin liners provide an excellent means to retain bin contents and protect them from dust, dirt and moisture while also reducing waste. Bin liners are available in all common sizes and packaged on convenient rolls.

### **Pallet Covers**

Pallet covers save you money by providing excellent protection from dust and moisture. Pallet covers are available in all common sizes and in a variety of gauge thicknesses to meet your needs.

### **High Density Trash Can Liners**

High Density Can Liners feature strong star seal bottom construction that helps them conform to the can's shape. They're a cost effective solution for everyday use.

Poly bags come in a wide range of sizes and gauge thicknesses. Contact your Class C Components Sales Representative today to find the right poly bag for your application.
